# Why study verbs + prepositions?

---

Prepositions are one of the most difficult things to master in the English language. They provide the “links” between the main words (nouns, verbs, and adjectives), but many English students have a hard time knowing **which preposition to use** in each situation.

This uncertainty can lead to lack of confidence and being afraid to speak – or speaking with lots of pauses as you try to think of the correct preposition.

Unfortunately, it’s not easy to give specific **rules** for when to use each preposition – but most verbs have a preposition that usually goes together. Some verbs can go with multiple prepositions, and sometimes the preposition makes a difference in the meaning of the phrase.

You can use this dictionary for **learning typical verb-preposition combinations**, as well as for reference. Each entry has an example sentence and any notes or explanations that could help you understand better.

The best way to remember these combinations of verbs and prepositions is not only to study the list... but also to **create your own example sentences!** Putting the verb + preposition combination into practice immediately helps you memorize it more easily.
