Student-Produced Response Questions

	COR. ANS.	DIFF. LEV.
9.	990	M
10.	30	E
11.	8, 10, 12	M
12.	3400	M
13.	450	M
14.	1/2, .5	M
15.	12	M
16.	5/11, .454, .455	M
17.	8	H
18.	16	H

no. correct
(9-18)

NOTE: Difficulty levels are E (easy), M (medium), and H (hard).

The SAT Scoring Process

Scoring. The computer compares the circle filled in for each question with the correct response. Each correct answer receives one point; omitted questions do not affect your score. For each wrong answer to a multiple-choice question, one-fourth of a point is subtracted to correct for random guessing. The SAT critical reading section has 67 questions. If, for example, a student has 44 right, 20 wrong, and 3 omitted, the resulting raw score is determined as follows:

$$44 \text{ right} - \frac{20 \text{ wrong}}{4} = 44 - 5 = 39 \text{ raw score points}$$

Obtaining raw scores frequently involves the rounding of fractions to the nearest whole number. For example, a raw score of 39.25 is rounded to 39, the nearest whole number. A raw score of 39.50 is rounded upward to 40. **For the WRITING SECTION**, your essay raw score counts approximately 30% and your multiple-choice raw score counts approximately 70%.

Converting to reported scaled score. Raw scores are then placed on the College Board scale of 200 to 800 through a process that adjusts scores to account for minor differences in difficulty among different versions of the test. This process, known as equating, is performed so that a student's reported score is not affected by the version of the test taken or by the abilities of the group with whom the student takes the test. As a result of placing SAT scores on the College Board scale, scores earned by students at different times can be compared. For example, an SAT critical reading score of 400 on a test taken at one administration indicates the same level of developed critical reading ability as a 400 score obtained on a different version of the test taken at another time.

Note: Since this test has not been previously administered, score ranges are provided for each possible raw score.

How to Score Practice Test #4

SAT Critical Reading Sections 3, 7, and 9

Step A: Count the number of correct answers for *Section 3* and record the number in the space provided on the Scoring Worksheet. Then do the same for the incorrect answers. (Do not count omitted answers.)

Step B: Count the number of correct answers and the number of incorrect answers for *Section 7* and record the numbers in the spaces provided on the Scoring Worksheet. (Do not count omitted answers.)

Step C: Count the number of correct answers and the number of incorrect answers for *Section 9* and record the numbers in the spaces provided on the Scoring Worksheet. (Do not count omitted answers.)

Step D: Total the number of correct responses. Total the number of incorrect responses. Enter the resulting figures on the Scoring Worksheet. To determine A, use the formula:

$$\text{Number correct} - \frac{\text{Number incorrect}}{4} = A$$

Step E: To obtain B, your Rounded Critical Reading Raw Score, round A to the nearest whole number. (For example, any number from 44.50 to 45.49 rounds to 45.) Enter the resulting figure on the Scoring Worksheet.

Step F: To find your Critical Reading Scaled Score Range, look up the Total Rounded Raw Score you obtained in step E in the Critical Reading Conversion Table (Table 1). Enter this range in the box on the Scoring Worksheet.

SAT Math Sections 2, 4, and 8

Step A: Count the number of correct answers and the number of incorrect answers for *Section 2* and record the numbers in the spaces provided on the Scoring Worksheet. (Do not count omitted answers.)

Step B: Count the number of correct answers and the number of incorrect answers for the multiple-choice questions (*questions 1 through 8*) in *Section 4* and record the numbers in the spaces provided on the Scoring Worksheet. (Do not count omitted answers.)

Step C: Count the number of correct answers for the student-produced response questions (*questions 9 through 18*) in *Section 4* and record the number in the space provided on the Scoring Worksheet.

Step D: Count the number of correct answers and the number of incorrect answers for *Section 8* and record the numbers in the spaces provided on the Scoring Worksheet. (Do not count omitted answers.)

Step E: Total the number of correct responses. Total the number of incorrect responses. Enter the resulting figures on the Scoring Worksheet. To determine A, use the formula:

$$\text{Number correct} - \frac{\text{Number incorrect}}{4} = A$$

Step F: To obtain B, your Math Rounded Raw Score, round A to the nearest whole number. (For example, any number from 44.50 to 45.49 rounds to 45.) Enter the resulting figure on the Scoring Worksheet.

Step G: To find your Math Scaled Score Range, use the Math Conversion Table (Table 2) to look up the Total Rounded Raw Score you obtained in step F. Enter this range in the box on the Scoring Worksheet.

SAT Writing Sections 1, 6, and 10

Step A: Enter your Essay Score for *Section 1* in the box on the Scoring Worksheet. (On this practice test, your essay score should range from 0 to 6. Keep in mind that on the actual SAT, two readers will read your essay and you will receive a total score of 0 to 12 on your score report.)

Step B: Count the number of correct answers and the number of incorrect answers for *Section 6* and record the numbers in the spaces provided on the Scoring Worksheet. (Do not count omitted answers.)

Step C: Count the number of correct answers and the number of incorrect answers for *Section 10* and record the numbers in the spaces provided on the Scoring Worksheet. (Do not count omitted answers.)

Step D: Total the number of correct responses. Total the number of incorrect responses. Enter the resulting figure on the Scoring Worksheet. To determine A, use the formula:

$$\text{Number correct} - \frac{\text{Number incorrect}}{4} = A$$

Step E: To obtain B, your Writing Multiple-Choice (MC) Rounded Raw Score, round A to the nearest whole number. (For example, any number from 44.50 to 45.49 round to 45.) Enter the resulting figure on the Scoring Worksheet.

Step F: To find your overall Writing Scaled Score Range, use Table 3. Look up the Total MC Rounded Raw Score you obtained in Step E in the left side of Table 3 and the Essay Score entered in Step A across the top of the table. Enter this range in the box on the Scoring Worksheet.

Step G: To find your Writing MC Subscore Range, look up the Total MC Rounded Raw Score you obtained in Step E on the Writing Multiple-Choice Conversion Table (Table 4). Enter this range in the box on the Scoring Worksheet.

Note: For the **WRITING SECTION**, your Essay Raw Score counts approximately 30% and your Multiple-Choice Raw Score counts approximately 70%.
